

If you have questions or need technical assistance prior to a video shoot email team@coalcreative.com

For immediate assistance, call (570) 212-9586

The Computer

If off, turn on the computer by pressing the power button on the back of the computer.

Select the Studio 16 South User (No Password)

Podcast (Audio Only)

If creating a podcast without video

Step 01 Launch Logic or Garageband

- Open the project called “Studio 16 South Template”
- Ensure the necessary tracks are set to record
 - ◆ Click the record button next to the track heading - it will begin to flash red
- Refer to the labeled cords and microphone inputs on the Focusrite USB interface

Step 02 Start Recording

Once your audio preferences (volume, gain, etc) are set, press the record button.

Step 03 Stop Recording

Press the stop button.

Troubleshooting

Not getting a signal from the audio interface(Focusrite Scarlett)?

- Ensure the red USB is plugged into the back of the iMac
- Visit the Mac System Preferences (Located when clicking the apple Icon in the upper lefthand corner) -- select **"Sound"** -- Choose the Input toggle -- Ensure input is set to the Focusrite Scarlett.
- Within the program preferences, ensure input is set to the Focusrite Scarlett.

Podcast | Video Recording / Streaming

Step 01 Launch Wirecast

Go to file -- open -- 2020 Podcast Template

See preset layers:

- 01 Video
 - ◆ Input from Black Magic Interface (Plug In to power)
- 02 Audio
 - ◆ Input from Focusrite Scarlett Interface (Power Button)
- 03 Graphics
 - ◆ Drag graphics from desktop or external drive

Check for signal from the cameras

Cameras

Ensure both cameras are turned on and that the SDI cable is running from the camera to the Black Magic Interface.

To switch between cameras, press the 1 or 2 option on the Black Magic interface.

Troubleshooting

Not looking right?

Adjust white balance (color) or gain (brightness) as needed

→ Menu (not touch screen) -- Gain -- White Balance

Not showing up?

Ensure Black Magic Interface is plugged in

Recording Vs. Streaming

Recording

Select Output from top menu

→ Choose destination

◆ Automatically sets to desktop folder

→ Press record to begin recording

→ Stop to end recording

Streaming

Select stream destination

Retrieve stream key from source
